

Scripted Curriculum Module:

**Tools to Support Strengthening Families Implementation**

<b>TIME</b>	60 minutes
<b>PURPOSE</b>	To obtain a broader understanding of the tools available to support implementation of the Strengthening Families approach.
<b>LEARNING OBJECTIVES</b>	Upon completion of this module, the participant be familiar with: <ol style="list-style-type: none"><li>1. Materials describing the Strengthening Families approach and Protective Factors Framework.</li><li>2. Program Self-Assessment tools.</li><li>3. The Strengthening Families Evaluation Portal.</li><li>4. Tools used to measure protective factors.</li><li>5. Online Training.</li><li>6. Café Conversations.</li></ol>
<b>INSTRUCTIONAL METHOD</b>	Lecture
<b>MATERIALS</b>	n/a
<b>ACTIVITY</b>	

# Tools to Support Strengthening Families Implementation

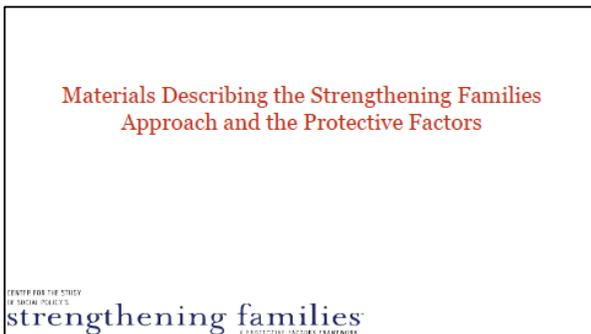

## SHOW SLIDE 1

**INTRODUCE:** Welcome back! The Strengthening Families team has continuously worked to develop tools to support implementation of the Strengthening Families approach and the Protective Factors Framework. The website at [www.strengtheningfamilies.net](http://www.strengtheningfamilies.net) has a wealth of tools and resources that can easily be adopted and adapted for any program or service sector. All of the materials on the website are available for free.

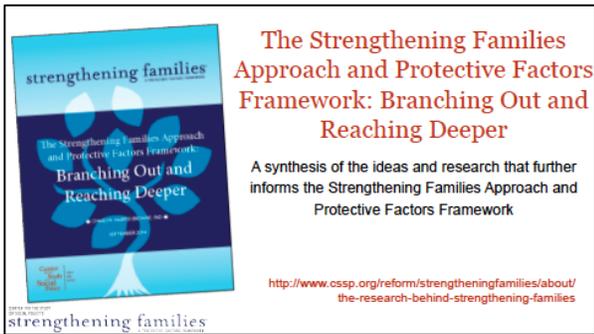

Now, let's take a more in-depth look at these tools and examine ways they can help you build Strengthening Families into practice.

## SHOW SLIDE 2

**STATE:** The first set of tools we'll talk about describe the Strengthening Families approach in a way that is accessible and comprehensible at all levels of implementation.

**SHOW SLIDE 3**

**STATE:** If you are looking for a thorough explanation of the science that informs Strengthening Families, look no further than the 2014 publication, “The Strengthening Families Approach and Protective Factors Framework: Branching Out and Reaching Deeper.”

**EXPAND:** The purpose of this report is to provide a synthesis of the neurobiological, behavioral and social science research that informs the Strengthening Families approach. This synthesis also reflects CSSP’s theory of change, which affirms that, to make real difference, we must build all domains of people’s social ecology—including the individual, family, relational, community, societal and policy realms.

**SHOW SLIDE 4**

**STATE:** Additionally, research briefs are available about each of the protective factors—parental resilience, social connections, concrete supports, knowledge of parenting and child development and social and emotional competence of children. These briefs provide clear definitions of the protective factors and outline the research informing each protective factor construct. They summarize what you learned in the earlier modules of this course and can be very useful as handouts to let others know what Strengthening Families is all about.

**SHOW SLIDE 5**

**STATE:** For an even more concise overview of the protective factors, our “Core Meanings of the Protective Factors” document further distills the information from the research briefs, providing a quick overview of each protective factor’s conceptualization.

**EXPAND:** This document was originally developed to help researchers and evaluators who were looking for a very succinct listing of the constructs within each of the protective factors so that they could identify indicators to measure them. It turned out that many others were also interested in the core meanings, so they are now available on the website.

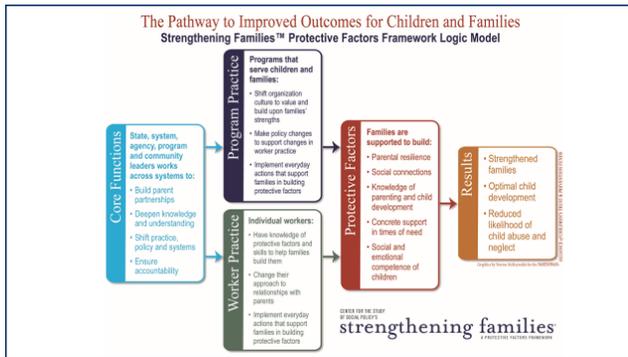

**SHOW SLIDE 6**

**EXPLAIN:** As you can see, this is an example of slides you can use to introduce colleagues and clients to the protective factors. Again, slides are available on strengtheningfamilies.net and provide:

- An overall definition of each protective factor,
- The core meanings of each protective factor based on our updated literature review and research briefs, and
- Everyday actions that can be taken in any setting where we interact with children and their families.

## SHOW SLIDE 7

**STATE:** Another tool for implementation is the Strengthening Families Logic Model. Our logic model serves to explicitly detail how the Strengthening Families approach leads to better outcomes for children and families.

**EXPLAIN:** Specifically, the logic model helps our partners to:

- Clarify strategies,
- Identify appropriate outcome targets,
- Align efforts across sectors,
- Guide the writing of grant proposals,
- Set priorities and estimate timelines,
- Identify necessary partnerships, and
- Negotiate roles and responsibilities.

**STATE:** This graphic summarizes the logic model's conceptualization of how the Strengthening Families approach leads to:

- Stronger families,
- Optimal child development, and
- Reduced likelihood of child abuse and neglect – as shown in the box farthest to the right.

**EXPLAIN:** Additionally, if you look at the second box from the right (rust colored), you can see a visual representation of the protective factors. Families build these protective factors when programs and workers shift practice skills to align with the Strengthening Families approach, as described in the stacked boxes.

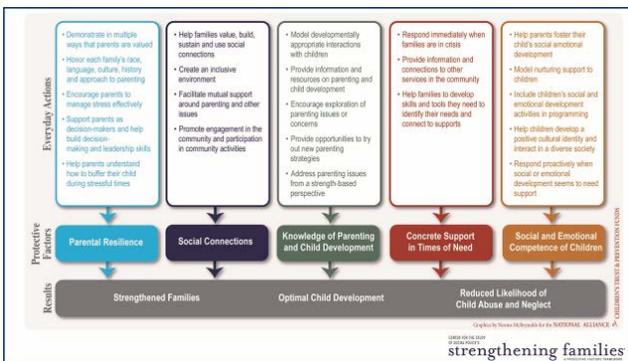

**EXPAND:** Shifts in program culture, policies and everyday practice, paired with workers' improved knowledge, skills, approach to practice and everyday actions, will support parents. Note that while workers can—and often do—make these changes on their own, their efforts will be much more successful when organizations work to formally support the Strengthening Families approach, as well.

**EXPLAIN:** From the light blue box on the left, you can see the specific functions that are carried out by leaders – at any level – to influence these kinds of shifts in program and worker practice.

**SUMMARIZE:** By following this logic model, we can help families build their protective factors and achieve better outcomes. We believe the future of Strengthening Families lies in creating a “new normal” for child- and family-serving organizations, helping workers:

- Build protective and promotive factors to reduce the potential for child maltreatment,
- Bolster resilience and mitigate the impact of traumatic events, and
- Create the best possible environment for the development of children and youth.

**SHOW SLIDE 8**

**EXPLAIN:** As you can see here, each protective factor section includes a set of “Everyday Actions.” Everyday Actions describe a variety of experiences and resources that programs can provide to help families build and strengthen a particular protective factor. Each Everyday Action is also accompanied by a list of concrete, actionable, observable and measurable items that programs can adopt.

**SHOW SLIDE 9**

The slide is titled 'The Toolkit for child welfare practitioners'. It features a red toolbox on the left. To the right of the toolbox is a bulleted list:  
 • Scripted Curriculum  
 • Practice tools for workers  
 • Supervisors' coaching tool  
 • Resources for families  
 The 'strengthening families' logo is at the bottom left.

**INTRODUCE:** Over the past four years, CSSP has been working with a number of child welfare jurisdictions in:

- Philadelphia, PA
- North Carolina
- Connecticut
- Utah
- Arlington, VA

Through this work we have been able to build a set of tools to support child welfare practitioners in implementing a Strengthening Families approach.

## SHOW SLIDE 10

**The Scripted Curriculum**

Eight Modules:

1. Introduction to CSSP's Protective and Promotive Factors Frameworks
2. Understanding the Strengthening Families Protective Factors
3. Youth Thrive
4. Trauma and Brain Development
5. Making Small But Significant Changes in Child Welfare Practice
6. Taking a Community Approach to Strengthening Families
7. The Research Behind Strengthening Families
8. Tools for Implementation

LEARN MORE ABOUT US  

**strengthening families**  
FOR CHILD WELFARE PRACTITIONERS

**EXPLAIN:** The scripted curriculum was designed as a resource for those training or doing professional development with child welfare workers around Strengthening Families. To provide the most complete set of resources for the field the scripted curriculum was designed to be a standalone tool which includes:

- Scripts and tips for trainers
- Hand-outs for participants
- Activities to be used in training

**EXPAND:** While the curriculum was designed so it can be used as a standalone training we recognize that most jurisdictions have existing training for child welfare workers. *One very powerful way to use the materials and tools within the scripted curriculum is to integrate them into existing trainings already being provided for child welfare workers. We encourage such adaptation as we think it is much more powerful, for instance, for workers to learn about how they can use the protective factors to design case planning objectives and activities while they are learning to use the jurisdiction's case planning tools.*

## SHOW SLIDE 11

**STATE:** Through work with states and jurisdictions that are integrating a protective and promotive factors approach into their child welfare practice, CSSP has developed a suite of tools for caseworkers and other staff to use at various points throughout a family's involvement in the child welfare system. The graphic in this slide shows the child welfare practice wheel – a generalized practice wheel that shows the core practice skills caseworkers need. Let's look at the tools available for each of these core practice areas.

## SHOW SLIDE 12

**STATE:** Simple Activities to do with Families to Build Protective Factors document is a collection of activities caseworkers can implement at any point in their work as they engage with families. These activities can be very useful in establishing a relationship – when we are first engaging families in services – and in ongoing relationship building and maintenance.

**STATE:** To support use of a protective factors approach when assessing families, Understanding Family Protective Factors—What to Ask and What to Look For provides caseworkers with concrete characteristics to look for and questions to ask. Some jurisdictions have incorporated protective factors content into their formal assessment tools – but any caseworker can use these questions and indicators in informal assessment of families as well.

**STATE:** Teaming is a strategy frequently used to support decision-making for a family, and is very much in line with a protective factors approach. Applying Strengthening Families in Teaming highlights how protective factors can be strengthened through three different types of family team meetings.

### SHOW SLIDE 13

**STATE:** **Using Protective Factors to Develop Objectives and Activities for Case Plans** contains, for each protective factor, a sample of a case objective and sample tasks and activities that could be incorporated in case planning. This is intended as an example of the types of objectives and activities that can be developed. In real life, objectives and activities will be developed in partnership with parents.

**STATE:** Casework visits are a unique opportunities to engage with caregivers and children in ways that support them to build their protective factors through the way caseworkers interact with the caregiver and child in ways that reinforce what is going right and gently provide support, advice and encouragement when caregivers or children are struggling. The **Building Protective Factors in Case Work Visits** guidance tool helps workers to think about the things they can do in every visit.

**STATE:** Just as we monitor other aspects of case progress, we also want to stay attuned to changes in the family's protective factors. In the end, as families transition out of their engagement with child welfare system, we want to be able to demonstrate that:

- The family made progress on their own protective factors goals
- The family can reliably draw upon their protective factors in ways that help prevent a repeat of the issues that brought them to the system
- The family has a plan in place for how to continue to nurture their protective factors once they are no longer involved with the system

The **Using Protective Factors as a Lens to Monitor Progress toward Case Closure** tool can be used in multiple ways:

- In early engagement with parents to discuss and agree on the type of growth in protective factors that could be used to indicate progress
- In family team meetings or other conversations with partners who are also supporting the family

- To help staff in documenting growth in family strengths for court reports and other case progress reports
- To support decisions about case closure

**SHOW SLIDE 14**

**Supervisors' Coaching Tool**

- Integrated tool for both Strengthening Families and Youth Thrive
- General Coaching worksheet
- For each protective factor
  - Worker skills
  - What to look for in the case plan and on-going activities with families and youth
  - Suggested coaching activities

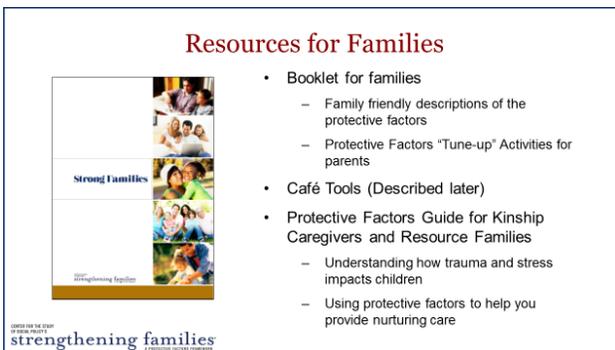

CENTER FOR THE STUDY OF SOCIAL POLICY  
**strengthening families**  
A NATIONAL YOUTH THRIVE INITIATIVE

**STATE:** While training is critical to introduce workers to the protective and promotive factor concepts, real uptake happens only when that knowledge is reinforced, and workers are supported in putting the ideas into practice in their day-to-day casework.

**The supervisor's coaching tool is designed to be used as a part of regular supervision sessions.** It provides supervisors with key questions on each of the protective and promotive factors. It can be used to guide discussion with caseworkers about specific families on their caseload and how to use a focus on protective and promotive factors within the case plan to reach their goals. Specifically, it helps identify:

- **Worker skills**
- **What to look for** in the case plan and on-going activities with families and youth
- **Coaching activities** to build workers skills for each protective and promotive factor

**SHOW SLIDE 15**

**Resources for Families**

- Booklet for families
  - Family friendly descriptions of the protective factors
  - Protective Factors "Tune-up" Activities for parents
- Café Tools (Described later)
- Protective Factors Guide for Kinship Caregivers and Resource Families
  - Understanding how trauma and stress impacts children
  - Using protective factors to help you provide nurturing care

CENTER FOR THE STUDY OF SOCIAL POLICY  
**strengthening families**  
A NATIONAL YOUTH THRIVE INITIATIVE

**EXPLAIN:** In addition, there are a number of resources that can be used directly with families:

- The **booklet for families** is written from a parent perspective. It provides family friendly descriptions of each of the protective factors as well as simple activities that a family can do to build each protective factor. States like Connecticut have used parent tools around the protective factors as an engagement tool for families as they first come into contact with child welfare services. The goal is to initiate engagement with families through the strength-based lens of the protective factors.
- Later in this module we are going to describe in more detail “Cafe Models” being used to engage parents in intimate, parent-to-parent conversations about protective factors. In Philadelphia, Cafés are being used in a structured way by the child welfare agency to ensure that families connected to the child welfare system are connected to other families and their communities in ways that explicitly address their protective factors.
- The **Protective Factors Guide for Kinship Caregivers and Resource Families** is designed to help caregivers who are caring for a child who has been removed from their parents understand how stress, trauma, and removal from their home and caregivers can impact a child. The guide encourages families to think about how they use the protective factors to support themselves so that they can best nurture the child in their care. The guide provides information on the protective factors and a worksheet for families and case workers to discuss to ensure that families are receiving the support they need.

## SHOW SLIDE 16

**INTRODUCE:** The next set of tools I’d like to cover are the Strengthening Families Self-Assessments for child- and family-serving programs.

**EXPLAIN:** Strengthening Families Self-Assessments help measure the presence of exemplary practices in field settings. Child- and family-serving programs can use these Self-Assessments to evaluate how well their current activities, services and program policies support families to build protective factors.

**SUMMARIZE:** In other words, the Strengthening Families Program Self-Assessments outline how the protective factors can be supported through small but significant changes in everyday program practice.

## SHOW SLIDE 17

### About the Self-Assessments

- Key implementation tool for programs adopting a Strengthening Families approach
- Helps programs identify “small but significant changes” that enhance their ability to build protective factors
- Created based on a national study of exemplary practice
- Designed to be used flexibly and to lead you to a concrete action plan
- Helps programs identify strengths & areas to focus
- Not an evaluation tool but a tool for continuous improvement

**EXPLAIN:** The Strengthening Families Program Self-Assessments:

- Were created based on a one-year study of exemplary practice and revised over time with input from professionals in each of the fields where Strengthening Families is used,
- Represent core tools for shifting program practices toward a Strengthening Families approach,
- Are designed to identify strengths and develop action plans around key areas of focus,
- Identify the everyday actions workers can take to support families in building protective factors, and
- Drive programmatic improvement through the facilitation of systematic reflection and action planning.

## SHOW SLIDE 18

### Four versions for different types of programs

- STRENGTHENING FAMILIES™ SELF-ASSESSMENT TOOL FOR CENTER-BASED EARLY CARE AND EDUCATION PROGRAMS
- STRENGTHENING FAMILIES™ SELF-ASSESSMENT TOOL FOR FAMILY CHILD CARE PROGRAMS
- STRENGTHENING FAMILIES™ SELF-ASSESSMENT TOOL FOR HOME VISITING PROGRAMS
- STRENGTHENING FAMILIES™ SELF-ASSESSMENT TOOL FOR COMMUNITY-BASED PROGRAMS

**STATE:** Originally, only two versions of the Self-Assessment were available:

- One for any kind of child- and family-serving program
- One for family child care providers.

**EXPLAIN:** However, our network participants soon identified a need for versions of the self-assessment specific to other kinds of programs. We worked to meet this need, and the Strengthening Families Self-Assessments are now available for all four program types listed on this slide—center-based early care and education programs, family child care programs, home visiting programs and community-based programs.

**EXPAND:** While there is significant overlap in content across these separate program versions, there are also specific strategies aligned with the particular context of each setting. The Self-Assessment tools are applicable to programs of any size, budget or structure. Almost all of the strategies described can be implemented without the need to:

- Create new staff positions,
- Make significant changes to existing facilities, or
- Use additional financial resources.

**ADD:** The two self-assessments for early care and education providers (center-based and family programs) are designed to support use as part of a quality rating and improvement system (QRIS). In these assessments, items are organized into tiers that represent different levels of program implementation efforts:

- The Baseline Tier, which reflects practices that all programs can implement very easily,
- The Mid-Level Tier, which reflects practices that require more attention to parent engagement, and,
- The High Tier, which reflects practices requiring high levels of focus on parental engagement and support.

**TRANSITION:** With the family child care tool, we tried to be attentive to the capacity of family child care providers by not expecting more than most programs can reasonably accomplish. Here, the “High Tier” is most appropriate for providers that are themselves receiving systemic support.

**EXPAND:** In addition, the center-based tool includes a fourth tier, “Comprehensive Service Programs,” for those centers that offer a more inclusive range of supports and services to children and families in addition to providing early care and education. This tier is highly applicable to programs like Head Start and comprehensive family support centers that include an early care and education component.

**SHOW SLIDE 19**

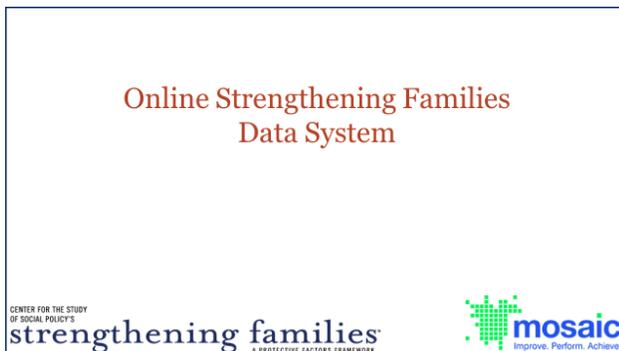

**INTRODUCE:** Each Self-Assessment is organized into five sections based on the five protective factors. Each Self-Assessment also includes tailored “Special Circumstances” sections, related, for example, to specific program needs like supporting children’s transitions or responding to possible child abuse.

**STATE:** The Self-Assessments are designed to be completed by a team including frontline staff, management and program participants or parents of children in the program. Team members may complete the self-assessment separately and then come together to discuss their ratings of the program's current use of each of the concrete strategies related to the everyday actions that support families to build each protective factor. Alternatively, the team can complete the self-assessment through a group process without completing individual copies in advance. The important thing is that there is room for respectful conversation about items where members of the team have different perspectives about how well the program is doing.

**EXPAND:** Once the self-assessment is complete, the team can select specific areas for improvement and develop an action plan to make some small but significant changes in their practice or in program policies.

## SHOW SLIDE 20

**INTRODUCE:** Next, I'd like to turn your attention to the online Strengthening Families Evaluation Portal. This set of tools is provided by CSSP's national partner, Mosaic Network, Inc. It is available for programs to use free of charge to complete their self-assessments and collect parent and staff surveys. State and regional organizations can pay a fee to have administrative access to data entered by programs.

## SHOW SLIDE 21

**STATE:** The Strengthening Families Evaluation Portal allows programs to:

- Create an account,
- Enter their self-assessment data,
- Develop an action plan based on their Self-Assessment results, and
- Collect and/or enter parent and staff surveys.

A variety of reports can be generated within the system to help programs analyze and document their Self-Assessment results. At the state level, administrators can also track aggregate data across programs.

### SHOW SLIDE 22

PARENT SURVEY (Protective Factors Survey)	STAFF SURVEY
•Measures changes in parental protective factors	•Looks at changes in staff attitudes, behaviors and skills
•Developed by the FRIENDS National Resource Center and the University of Kansas	•Developed by a collaborative team from 7 states—with review and input from evaluators in 3 states
•Four national field tests to establish reliability and validity	•Has not been extensively tested

CENTER FOR THE STUDY OF SOCIAL POLICY  
strengthening families

**EXPLAIN:** As I mentioned before, the Strengthening Families Evaluation Portal also includes two additional survey tools: the Protective Factors Survey and a staff survey.

**EXPAND:** The Protective Factors Survey measures changes in parents' self-reported protective factors. It has been extensively tested for reliability and validity, and is designed to be used as a pre and post-test to measure change over time. The Staff Survey is used within practice settings to measure changes in staff attitudes, behaviors and skills.

### SHOW SLIDE 23

Tools to Measure Protective Factors

CENTER FOR THE STUDY OF SOCIAL POLICY  
strengthening families  
A PROTECTIVE FACTORS FRAMEWORK

**INTRODUCE:** Next up, let's take a look more closely at two tools used to measure protective factors: The Parents' Assessment of Protective Factors and the Protective Factors Survey.

**SHOW SLIDE 24**

**Parents' Assessment of Protective Factors**

- Individualized, strengths-based measure to assess the presence, strength and growth of parents' self-reported beliefs, feelings and behaviors that are regarded as indicators of the Strengthening Families protective factors
- 36 statements; parent indicates the degree to which the statement is like the parent or what the parent believes
- Intended for parents of young children from birth to 8 years old
- Developed through the Quality Improvement Center on Early Childhood; released by CSSP in 2014

**STATE:** The Parents' Assessment of Protective Factors, or PAPF, is a strengths-based measure used to assess the presence, strength and growth of parents' self-reported beliefs, feelings and behaviors that are linked to the protective factors. The tool is available in both English and Spanish. A user guide and scoring sheet are also available on the Strengthening Families website. The PAPF was developed through the federal Quality Improvement Center on Early Childhood and was released in 2014.

**SHOW SLIDE 25**

**Parents' Assessment of Protective Factors**

The Parents' Assessment of Protective Factors yields valid and reliable results that can be used to:

- a) prompt specific shared conversations with a parent about building or reinforcing their protective factors;
- b) engage a parent as a partner in developing and implementing a service plan; and
- c) mobilize a parent's resources to meet their unique, individualized needs in order to strengthen the parent's capabilities and provide a family environment that promotes optimal child development and reduces the likelihood of negative child and family outcomes.

**STATE:** The Parents' Assessment of Protective Factors has been tested for validity and reliability. It is not designed to be used as a screening or diagnostic tool, but is a useful tool in engaging a parent in conversation, engaging a parent in developing a service plan, or working with a parent to use their strengths and resources to meet their family's needs.

**SHOW SLIDE 26**

**The Protective Factors Survey (PFS)**

An evidence-based, (reliability and validity tested) 20-item caregiver-completed tool used to help measure changes in family protective factors.

Provides feedback to agencies for continuous improvement and evaluation purposes. It is not intended for individual assessment, placement or diagnostic purposes. Agencies should rely on other instruments for clinical use.

Developed through a partnership with FRIENDS and The University of Kansas with input from multiple experts in the field, parent leaders, prevention workers and hundreds of families.

Being widely used in states across the country.

CENTER FOR THE STUDY OF SOCIAL POLICY  
**strengthening families**

<http://friendsnrc.org/protective-factors-survey>

**STATE:** The FRIENDS National Resource Center created the Protective Factors Survey (PFS) as an evidence-based, reliability and validity tested, 20-item, caregiver-completed tool to help measure changes in family protective factors. While not intended for individual assessment, placement or diagnostic purposes, the PFS does provide feedback to agencies for continuous improvement and evaluation purposes.

**EXPLAIN:** The survey results are designed to provide agencies with several pieces of important information, including:

- A snapshot of the families they serve,
- Changes in current levels of family protective factors, and
- Areas where workers can focus on increasing family protective factors.

**SHOW SLIDE 27**

**When PFS scores were high...**

**Positive correlations**

- Effective coping was high
- Physical and emotional health was good
- Positive emotions were high
- Optimism was high

**Negative Correlations**

- Child abuse and neglect potential was low
- Stress was low
- Depression was low
- Negative emotions were low
- Pessimism was low

CENTER FOR THE STUDY OF SOCIAL POLICY  
**strengthening families**

**EXPAND:** The FRIENDS National Resource Center has analyzed PFS data from several states and found the correlations listed here. Programs can look for similar correlations among their own participants. As I mentioned before, the PFS is available for use on the Strengthening Families Evaluation Portal.

**SHOW SLIDE 28**

**INTRODUCE:** Yet another available tool is a free online training provided by The National Alliance of Children’s Trust and Prevention Funds. Again, this is a tool provided by a national partner of CSSP which has been a great resource for programs, states and communities implementing Strengthening Families.

**SHOW SLIDE 29**

**Bringing the Protective Factors Framework to Life in Your Work**

- Online training to support implementation of the Strengthening Families™ Protective Factors Framework in multiple settings
- Systems may use for awarding CEUs, credit
- Free of charge
- 7 courses, each about 2 hours in length
  - Introduction to the Framework (also useful as a stand-alone orientation)
  - A course on each of the 5 Protective Factors
  - A wrap-up course that moves users from knowledge to action

Find at [www.ctfalliance.org/onlinetraining](http://www.ctfalliance.org/onlinetraining)  
Contact [onlinetraining@ctfalliance.org](mailto:onlinetraining@ctfalliance.org)

**EXPLAIN:** The Alliance offers this 7-part, 14-hour Strengthening Families training for free online. As a free service, this is a valuable tool for introducing the basics of Strengthening Families within an agency, organization or system.

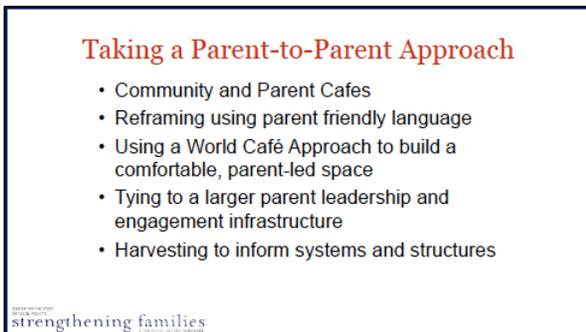

**STATE:** The Alliance also offers a training of trainers for an in-person version of this in-depth curriculum. More information about the online and in-person training is available at [www.ctfalliance.org/training](http://www.ctfalliance.org/training).

**SHOW SLIDE 30**

**INTRODUCE:** Finally, a key element in many states’ and communities’ implementation of Strengthening Families has been the use of café-style conversations among parents and caregivers. Cafés are a method of facilitating meaningful, reflective conversations that promote leadership and collaboration. These gatherings, derived from the World Café model, bring community members together for a series of structured conversations that directly or indirectly address protective factors. Through participation in cafés, parents and caregivers build leadership and relationships as well as the protective factors that help to strengthen their families.

**SHOW SLIDE 31**

**EXPLAIN:** Both the Parent Café and Community Café models were developed based on the Strengthening Families framework, and both are implemented in partnership with parent leaders. Cafés are an accessible way to build parent leadership into existing practices and infrastructures. In Community Cafés and Parent Cafés, parents are introduced to the protective factors using less formal language, and have conversations about how to strengthen their own families and communities. Each café ends with a “harvest” where the ideas discussed are gathered so that they can be put to use in a system, organization, or community.

## SHOW SLIDE 32

### The basis: World Café

- A method for “engaging people in conversations that matter”
- Includes a set of design principles and a basic strategy for engaging people in small-group conversations
- Cafés designed for parents to build protective factors are just one of many ways the World Café method has been adapted and used around the world
- For more: <http://www.theworldcafe.com/about.html>

© 2014 THE UNIVERSITY OF CHICAGO  
STRENGTHENING FAMILIES

**EXPLAIN:** As I mentioned previously, cafés designed to build protective factors are based on the World Café approach—a set of design principles and a basic strategy for engaging people in small-group conversations. Cafés designed for parents to build protective factors are just one of many ways the World Café method has been adapted and used around the world.

## SHOW SLIDE 33

### Parent Café

- Developed by parent leaders as part of Strengthening Families-Illinois in 2007, and is now housed with Be Strong Families
- Provide a safe, non-judgmental opportunity for parents and caregivers to: build their protective factors, talk about what it means to keep their children safe and families strong and build parent leadership
- Parent Café training, a fidelity framework, “Parent Café in a Box” and evaluation tools are available from Be Strong Families at <http://www.bestrongfamilies.net/build-protective-factors/parent-cafes/>

© 2014 THE UNIVERSITY OF CHICAGO  
STRENGTHENING FAMILIES

**EXPLAIN:** The Parent Café model was developed by parent leaders as part of Strengthening Families-Illinois in 2007, and is now housed with Be Strong Families. Parent Cafés provide a safe, non-judgmental opportunity for parents and caregivers to build their protective factors while engaging in conversations about what it means to keep their children safe and families strong, while also building parent leadership. Parent Cafés are structured around questions related to each of the five Strengthening Families protective factors.

**SHOW SLIDE 34**

**Community Café**

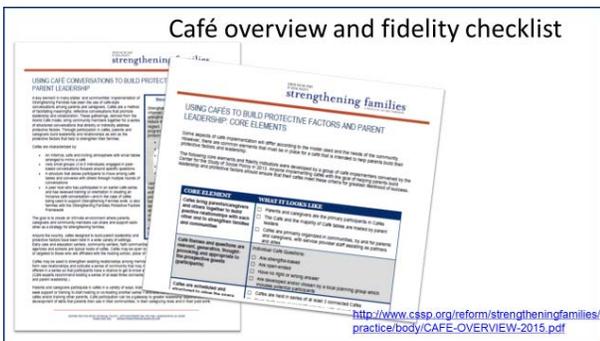

- Developed by parent volunteers in Washington State and is now supported by a volunteer Community Café Leadership Team
- Designed to respond to community needs and concerns as well as reflect the local community culture
- Café questions may or may not directly address the protective factors, but hosts use the Protective Factors Framework as a guiding framework
- Through Community Cafés, parents and caregivers build their leadership, resilience, social connections and other protective factors
- Leadership Team offers an online orientation kit as well as orientation and guidance at <http://thecommunitycafe.com/>

© 2014 CSPP  
**strengthening families**  
A PARTNERSHIP WITH THE WASHINGTON STATE DEPARTMENT OF SOCIAL & HEALTH SERVICES

**EXPLAIN:** The Community Café model was developed by parent volunteers in Washington State and is now supported by a volunteer Community Café Leadership Team. Community Cafés are designed to respond to community needs and concerns as well as reflect the local community culture. Café questions may or may not directly address the Strengthening Families protective factors, depending on the topic selected by the organizers – but hosts use the Protective Factors Framework as a guiding framework. Through the process of organizing, hosting and/or participating in a Community Café, parents and caregivers build their leadership, resilience, social connections and other protective factors.

**SHOW SLIDE 35**

**Café overview and fidelity checklist**

<http://www.cssp.org/reform/strengtheningfamilies/practicebody/CAFE-OVERVIEW-2013.pdf>

**EXPLAIN:** In 2014, CSSP invited the developers of Parent Café and Community Café, as well as people implementing both models and other forms of café conversations, to come together to identify the common ground and core elements of any café that would help to build protective factors and parent leadership.

**CLICK to bring up the second image**

**CONTINUE:** No matter what model you are using, the “fidelity checklist” generated by that group is a helpful guide for creating an effective café experience. The document is available on CSSP’s website.

**SHOW SLIDE 36**

**ASK:** Now, before I wrap up, are there any questions about anything I have covered?

**SUMMARIZE:** Thank you for your participation today! Each tool we covered in this module is designed to facilitate your implementation of Strengthening Families. We are confident that these tools will be helpful resources as you implement the Strengthening Families Approach and Protective Factors Framework.
