

Four Strategies for Embodying Equity in Our Work

External Relationships

Partnerships (including funders) and networks are aware of CSSP's commitment to equity, our analysis, and approach to our work.

Framing & Communications

Communications analyzes root causes and systemic origins of inequities, historical and current inequities, impacts of White supremacy, who is privileged and who is harmed.

Accountability & Results

Vehicles and processes exist for holding leaders and staff accountable—internally and externally—for promoting and embodying equity in our work; results that improve inequities are identified and achieved.

Learning & Improvement

Consistent opportunities for all staff to further build knowledge and skills to advance equity—both internally and externally in our work.
